While annual revenues were largely flat compared with 2017, our bottom line performance was meaningfully improved thanks to a variety of cost saving efforts. For Sohu Media Portal, daily active users of Sohu News App, our flagship mobile product, outpaced the industry's growth, benefitting from superior content and continued upgrades of the recommendation engine. For Sohu Video, we focused on original program production, providing users unique and high quality dramas and shows. In the meantime, we significantly cut spending on traditional TV programs and successfully lowered the segment loss over 50% from 2017. In 2018, Sogou's mobile search and mobile keyboard continued to gain user traction while its leading AI capabilities have been not only recognized in international contests, but also applied to new commercial use cases. Lastly, Changyou will strengthen its R&D capabilities to launch more hit cames."

Online game revenues for the fourth quarter of 2018 were US\$94 million, down 14% year-over-year and 2% quarter-over-quarter. The year-over-year decrease was due to the natural decline in revenue of the Company's older games, including Legacy TLBB Mobile.

Gross Margin

Both GAAP and non-GAAP^[4] gross margin was 43% for the fourth quarter of 2018, compared with 46% in the fourth quarter of 2017 and 43% in the third quarter of 2018.

Both GAAP and non-GAAP gross margin for the online advertising business for the fourth quarter of 2018 was 32%, compared with 37% in the fourth quarter of 2017 and 32% in the third quarter of 2018.

Non-GAAP gross margin for the brand advertising business was 26%, compared with negative 17% in the fourth quarter of 2017 and 23% in the third quarter of 2018. The year-over-year margin improvement was mainly due to decreased video content cost and impairment charges for video content cost recognized in the fourth quarter of 2017.

Both GAAP and non-GAAP gross margin for the search and search-related advertising business in the fourth quarter of 2018 was 34%, compared with 52% in the fourth quarter of 2017 and 34% in the third quarter of 2018. The year-over-year decrease primarily resulted from increases in traffic acquisition costs outpacing revenue growth.

Both GAAP and non-GAAP gross margin for online games in the fourth quarter of 2018 was 85%, compared with 84% in the fourth quarter of 2017 and 84% in the third quarter of 2018.

[4] Non-GAAP results exclude share-based compensation expense; non-cash tax benefits from excess tax deductions related to share-based awards; changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values; income/expense from the adjustment of contingent consideration previously recorded for acquisitions; dividends and deemed dividends to non-controlling preferred shareholders of Sogou; a one-time income tax expense recognized in the fourth quarter of 2017 as a result of the one-time transition tax

For the fourth quarter of 2018, GAAP operating expenses totaled US\$254 million, down 8% year-over-year and up 2% quarter-over-quarter. Non-GAAP operating expenses were US\$252 million, down 1% year-over-year and up 2% quarter-over-quarter. The year-over-year decrease in GAAP operating expenses was mainly due to decreases in salary and benefit expenses. Operating expenses for the fourth quarter of 2018 included an approximately US\$16 million impairment charge recognized by Changyou related to its 17173.com website business.

Operating Loss

GAAP operating loss for the fourth quarter of 2018 was US\$48 million, compared with an operating loss of US\$41 million in the fourth quarter of 2017 and an operating loss of US\$49 million in the third quarter of 2018.

The year-over-year increase was mainly attributable to an increase in gain from Sogou's short-term investments in the fourth quarter of 2018. The quarter-over-quarter decrease was mainly attributable to Sogou'sUS\$18 million gain from one of its equity investments in the third quarter of 2018.

Income Tax Expense

GAAP income tax benefit was US\$70 million for the fourth quarter of 2018, compared with income tax expense of US\$234 million in the fourth quarter of 2017 and income tax benefit of US\$13 million in the third quarter of 2018. The change from GAAP income tax expense to income tax benefit for the fourth quarter of 2018 from the fourth quarter of 2017 and the increase in income tax benefit from the third quarter of 2017 as a result of the one-time income tax expense recognized in the fourth quarter of 2017 as a result of the one-time transition tax (the "Toll Charge") imposed by the U.S. Tax Cuts and Jobs Act signed into law on December 22, 2017 (the "TCJA"); the subsequent re-evaluation for the fourth quarter of 2018 and adjustment of the tax expense previously recognized for the Toll Charge; the resulting recognition of a previously unrecognized tax benefit and recording of an uncertain tax position related to the balance of the Toll Charge; and interest accrued in relation to the previously unrecognized tax benefit^[6].

^[5] The revised treatment of the Toll Charge is based on management's estimate of the tax benefit and related uncertain tax position as of December 31, 2018, which is management's estimate pursuant to SEC Staff Accounting Bulletin No. 118, and the uncertain tax position related to the Toll Charge may be subject to further adjustment in subsequent periods based on future circumstances, such as final IRS Toll Charge regulations published in January 2019, and on management's judgment and estimates.

For the first quarter 2019 guidance, the Company has adopted a presumed exchange rate of RMB6.90=US\$1.00, as compared with the actual exchange rate of approximately RMB6.36=US\$1.00 for the first quarter of 2018, and RMB6.91=US\$1.00 for the fourth quarter of 2018.

Non-GAAP Disclosure

To supplement the unaudited consolidated financial statements presented in accordance with accounting principles generally accepted in the United States of America ("GAAP"), Sohu's management uses non-GAAP measures of gross profit, operating profit, net income, net income attributable to Sohu.com Limited and diluted net income attributable to Sohu.com Limited and and to share-based awards; changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values; income/expense from the adjusted for acquisitions; dividend and deemed dividend to non-controlling preferred shareholders; the one-time income tax expense recognized in the fourth quarter of 2017 as a result of the Toil Charge imposed by the TCJA and the subsequent re-evaluation for the fourth quarter of 2018 and adjustment of the tax expense previously recorgonized for an uncertain tax position related to the balance of the balance of the Toil Charge; the resulting recognizion of a previously unrecognized to mection with GAAP, but should not be considered a substitute for, or superior to, GAAP results.

Sohu's management believes excluding share-based compensation expense, changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values; non-cash tax benefits from excess tax deductions related to share-based awards; income/expense from the adjustment of contingent consideration previously recorded for acquisitions; dividend and deemed dividend to non-controlling preferred shareholders; and income tax expense, income tax benefit, uncertain tax position, and interest recognized in relation to the Toll Charge from its non-GAAP financial measure is useful for itself and investors. Further, the impact of share-based compensation expense and changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values; non-cash tax benefits from excess tax deductions related to share-based awards; income/expense from the adjustment of contingent consideration previously recorded for acquisitions; dividend and deemed dividend to non-controlling preferred shareholders; the one-time income tax expense recognized in the fourth quarter of 2017 as a result of the Toll Charae imposed by the TCJA and the subsequent re-evaluation for the fourth guarter of 2018 and adjustment of the tax expense previously recognized for the Toll Charae; the resulting recognition of a previously unrecognized tax benefit and recording of an uncertain tax position related to the balance of the Toil Charge; and interest expense recognized in connection with the Toil Charge cannot be anticipated by management and business line leaders and these expenses were not built into the annual budgets and quarterly forecasts that have been the basis for information Sohu provides to analysts and investors as guidance for future operating performance. As the impact of share-based compensation expense and changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values, non-cash tax benefits from excess tax deductions related to share-based awards, income/expense from the adjustment of contingent consideration previously recorded for acquisitions, and dividend and deemed dividend to non-controlling preferred shareholders does not involve subsequent cash outflow or is reflected in the cash flows at the equity transaction level, Sohu does not factor this impact in when evaluating and approving expenditures or when determining the allocation of its resources to its business segments. As a result, in general, the monthly financial results for internal reporting and any performance measures for commissions and bonuses are based on non-GAAP financial measures that exclude share-based compensation expense and changes in fair value recognized in the Company's consolidated statements of operations with respect to equity investments with readily determinable fair values, non-cash tax benefits from excess tax deductions related to share-based awards, income/expense from the adjustment of contingent consideration previously recorded for acquisitions, and dividend and deemed dividend to non-controlling preferred shareholders, and also excluded the one-time income tax expense recognized in the fourth quarter of 2017 as a result of the Toll Charge imposed by the TCJA and the subsequent re-evaluation for the fourth quarter of 2018 and adjustment of the tax expense previously recognized for the Toll Charge, the resulting recognition of a previously unrecognized tax benefit and recording of an uncertain tax position related to the balance of the Toll Charge, and interest expense recognized in connection with the Toll Charge.

The non-GAAP financial measures are provided to enhance investors' overall understanding of Sohu's current financial performance and prospects for the future. A limitation of using non-GAAP gross profit, operating profit, net income, net income attributable to Sohu.com Limited and diluted net income attributable to Sohu.com Limited per share, excluding share-based compensation expense, non-cash tax benefits from excess tax deductions related to share-based awards, income/expense from the adjustment of contingent consideration previously recorded for acquisitions, dividend, and deemed dividend to non-controlling preferred shareholders is that the impact of share-based awards and non-cash tax benefits from excess tax deductions related to share-based awards has been and will continue to be a significant recurring expense in Sohu's business for the foreseeable future, income/expense from the adjustment of contingent consideration previously recorded for acquisitions may recur in the future, and dividend and deemed dividend to non-controlling preferred shareholders may recur when Sohu and its affiliates enter into equity transactions. In order to mitigate these limitations Sohu has provided specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables include details on the reconciliation between the GAAP financial measures that have been presented.

Notes to Financial Information

Financial information in this press release other than the information indicated as being non-GAAP is derived from Sohu's unaudited interim financial statements prepared in accordance with GAAP.

^[6] The impairment was mainly related to Changyou's 17173.com website business. The launch of new initiatives for the 17173.com website fell behind schedule in the fourth quarter of 2018, and the profit outlook of the business remained uncertain. In addition, due to more stringent regulations, there was a significant decline in the number of new game launches in the market, so the number of games marketed on 17173.com would likely fall short of expectations, and that impairment charges were required.

^[7] In October 2018, to roll over matured offshore financing facilities, Changyou entered into a bank loan agreement pursuant to which it has drawn down U.S. dollar-denominated loans in the aggregate amount of US\$220 million that are secured by restricted time deposits of RMB1.7 billion (approximately US\$244 million). All of the loans carry a floating rate of interest based on the LIBOR. All of the loans are due to be repaid, and accordingly the restricted time deposits released, in 2021.
